

Nanofiber Veterinary™ Secures Distribution Deal with Medical Australia

Strategic Alignment with Stem-cell Therapy Leader

Atlanta, GA (September 11, 2014) – Nanofiber Veterinary™, the leading veterinary distributor of synthetic nanofiber scaffolds and technology innovator, announces a distribution deal with Medical Australia Limited (ASX: MLA), a human and animal healthcare company. Through MediVet, a full subsidiary of MLA, the two companies share focus on developing and commercializing innovative therapies that improve, and oftentimes save, lives. Recognizing the change in the animal healthcare industry this partnership will increase the efficacy, continued learning experience and hands-on access to veterinary regenerative medicine. Nanofiber Veterinary offers MLA exclusivity to its highly innovative product lines NanoWhiskersV™ and NanoCareV™ in Australia, Japan, and the United States.

NanoWhiskersV™ offers an effective non-surgical means for treating a wide variety of joint and muscular ailments. The treatment uses adult animal stem cells (no embryonic stem cells are used), now utilizing MediVet's kit and equipment, and involves removing stem cells from an adipose fat sample, activating them and then injecting them into the affected area, all of which can be done in-clinic on the same day.

NanoCareV™ carries the same advances in synthetic nanofiber technologies with a wound care mesh to enhance the healing process of chronic wounds, burns, and others areas with typically slow healing.

Timm Peddie of Nanofiber Veterinary, comments "We continue to be excited to help animal owners with innovative solutions and look forward to our strategic alliance with Medical Australia Limited."

MLA Chief Operating Officer Darryl Ellis adds, "This is a great development for MLA, as these products are not only complementary to our own stem cell therapies, they will further enable and broaden their use and application. We are now uniquely positioned to take advantage of our existing technologies and become a leader in this field."

About Nanofiber Veterinary:

Nanofiber Veterinary™ offers advanced veterinary products and works with leaders in life science research, including being the exclusive global channel for Nanofiber Solutions for the veterinary market, offering the only translational 3D cell culture products in the veterinary market. The company works with leading veterinary researchers, surgeons, and distributors around the world.
